5. **Hospital Slip Upload:** Camera/Gallery picker with alignment boundary overlay for requisition slips (capturing doctor stamp, MRN, letterhead).

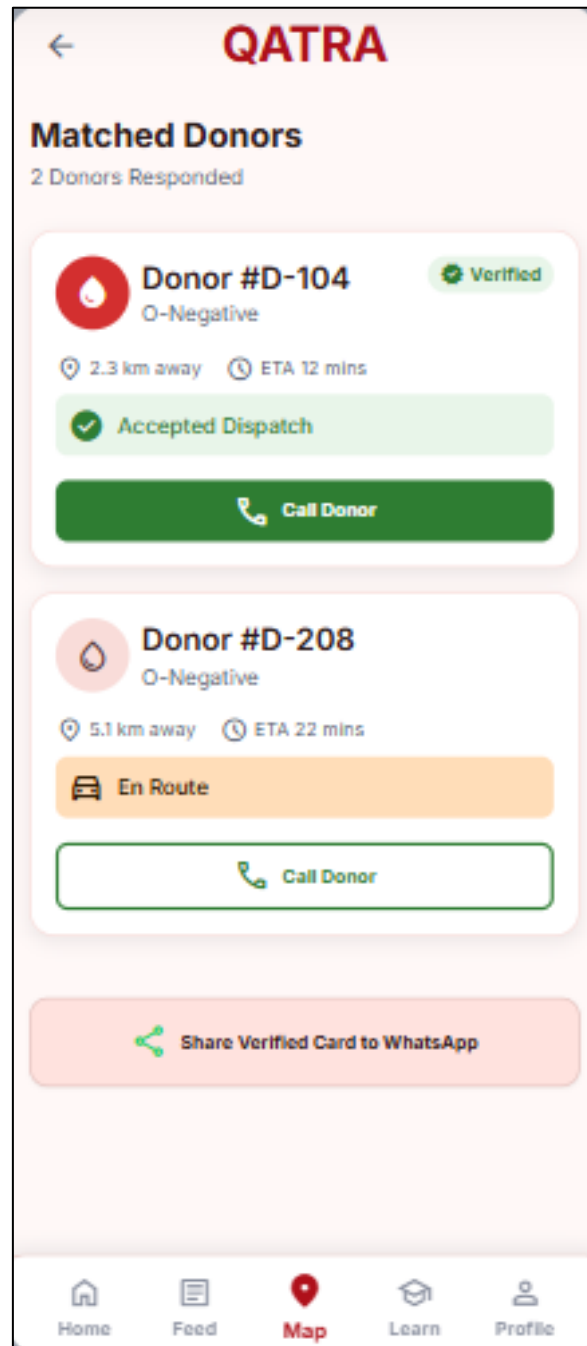

6. **Verification Processing Modal:** Dynamic status modal showing OCR extraction → Admin Review Queue with an estimated under-3-minute timer.

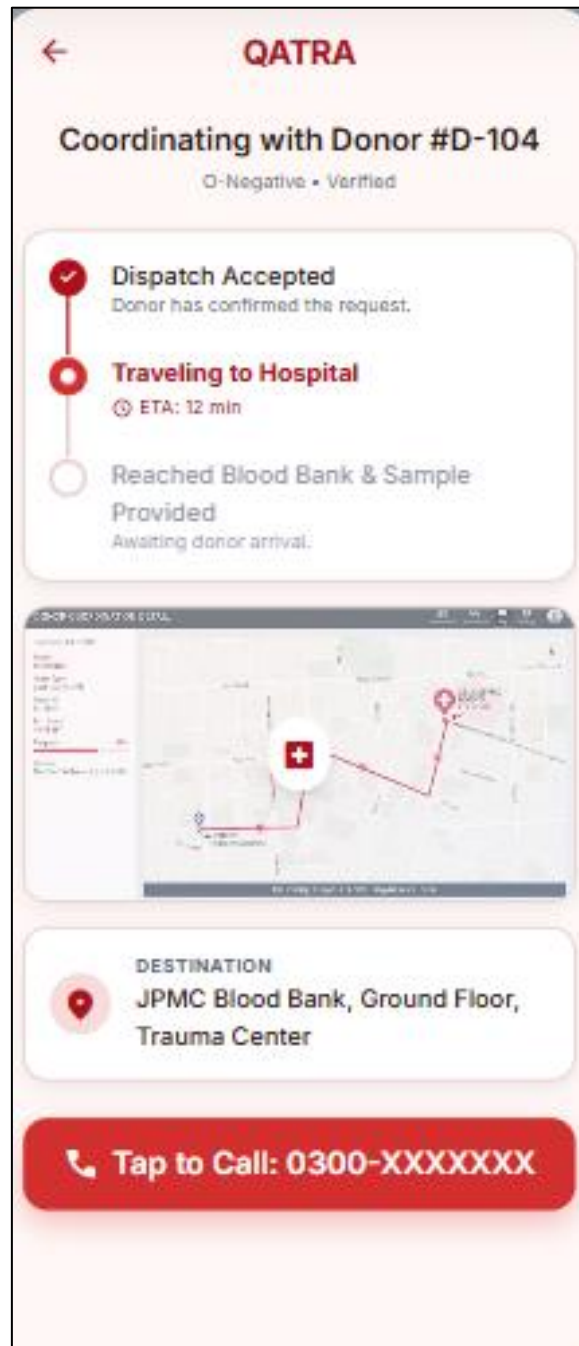

7. **Request Feed Status (Active):** Seeker card displaying "Request Published & Geo-Search Active".

8. **Matchmaker Dashboard (My Requests):** Proximity-ranked card listing incoming accepted donors with masked names (e.g., *Donor #A-482*), live distance (e.g., 2.3 km), and ETA (12 mins).

9. **Masked Calling / Chat Interface:** Proxy communication interface showing a 2-minute connection countdown with zero raw phone number exposure.

10. **Donation Confirmation & Closure:** Unit fulfillment toggle, seeker feedback, and "Mark Request as Fulfilled" action.

B. Donor User Journey Wireframes (8 Screens)

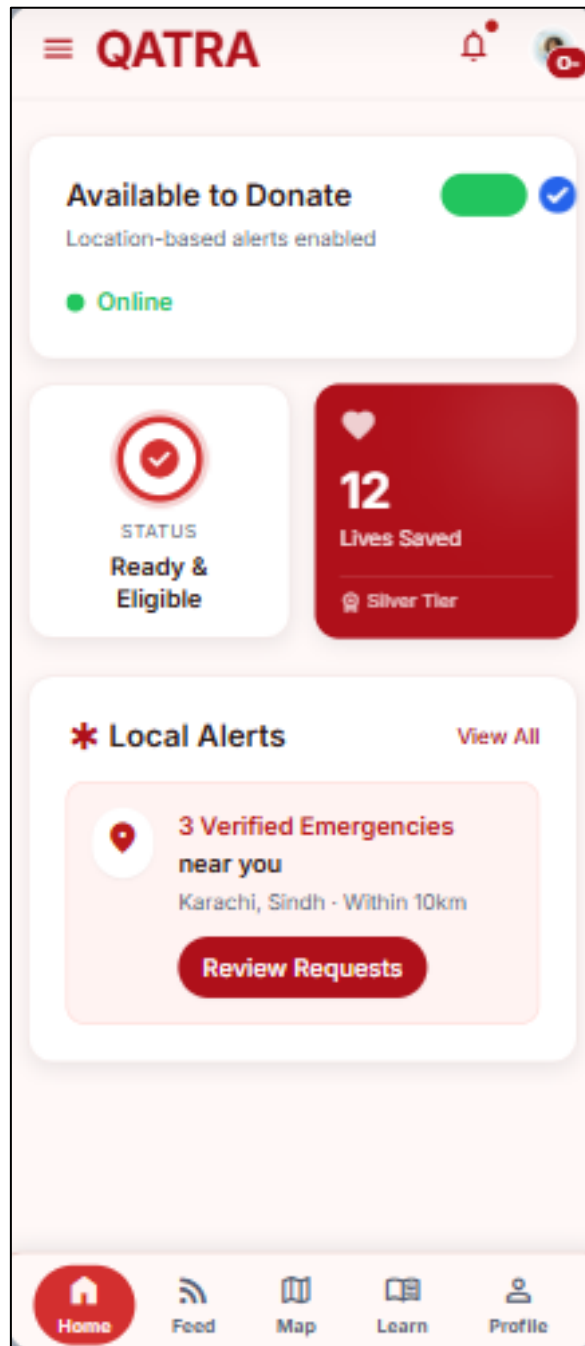

1. **Donor Onboarding & Identity Binding:** CNIC front/back upload with automated checksum validation.

The wireframe shows a mobile app screen for 'Donor Identity Verification'. At the top, there is a header bar with a back arrow and the word 'QATRA'. Below the header, the title 'Donor Identity Verification' is displayed, followed by a subtitle: 'Please provide your valid CNIC details to ensure a secure donation process.' The main form area contains three sections: 1. 'CNIC Number' with a text input field showing a placeholder 'XXXXX-XXXXXXX-X'. 2. 'Upload CNIC Photos' with two image upload buttons labeled 'Front CNIC Image' and 'Back CNIC Image', each featuring a camera icon. 3. A security notice in a light blue box: 'Data is AES-256 encrypted in an isolated vault and never exposed publicly.' At the bottom of the screen is a large red button labeled 'Submit & Proceed to Health Check'.

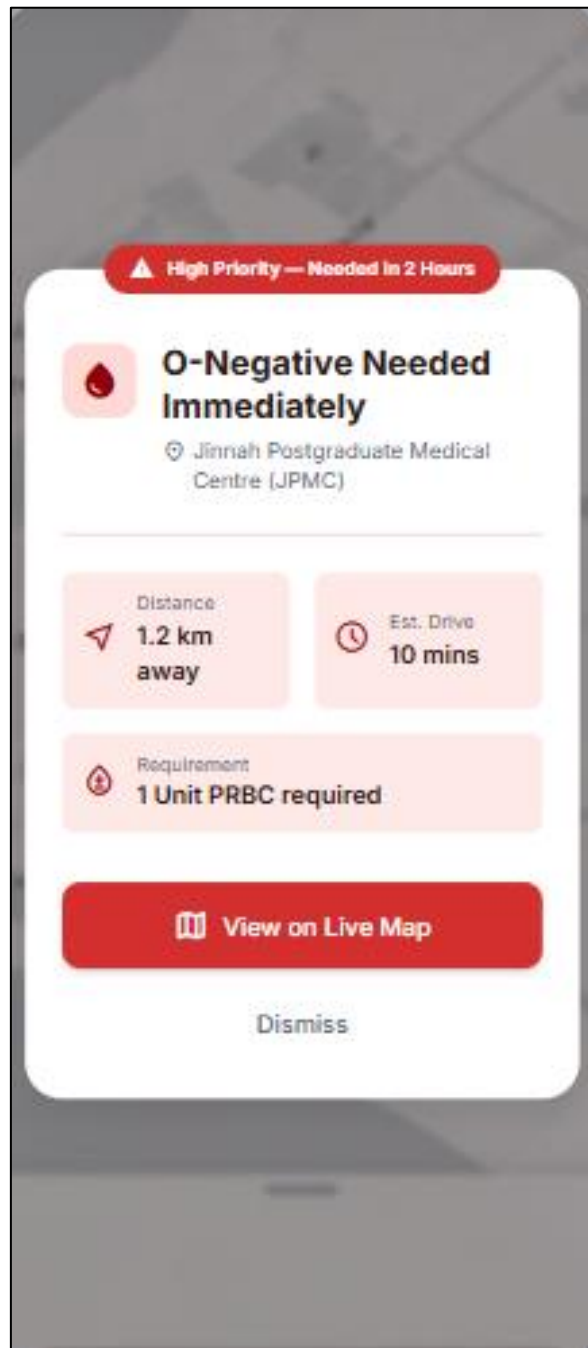

2. **Pre-Screening Health Checklist:** 4-step interactive quiz evaluating age, weight, recent medication/fever (14-day hold), and 6-month deferrals.

The screenshot shows a mobile app interface for 'Health Eligibility'. At the top, there is a back arrow and the title 'Health Eligibility'. Below this, a progress bar indicates 'Step 1 of 4' and '25%'. The main content area is titled 'Basic Requirements' with a red icon. Below the title, a message states: 'To ensure donor safety, please confirm you meet the minimum physical requirements.' There are two toggle switches: 'Age' with the text 'I am between 18 and 65 years old.' and 'Weight' with the text 'I weigh at least 50 kg (110 lbs)'. Both switches are turned on, indicated by a blue checkmark and a green bar. At the bottom of the form is a red 'Continue' button.

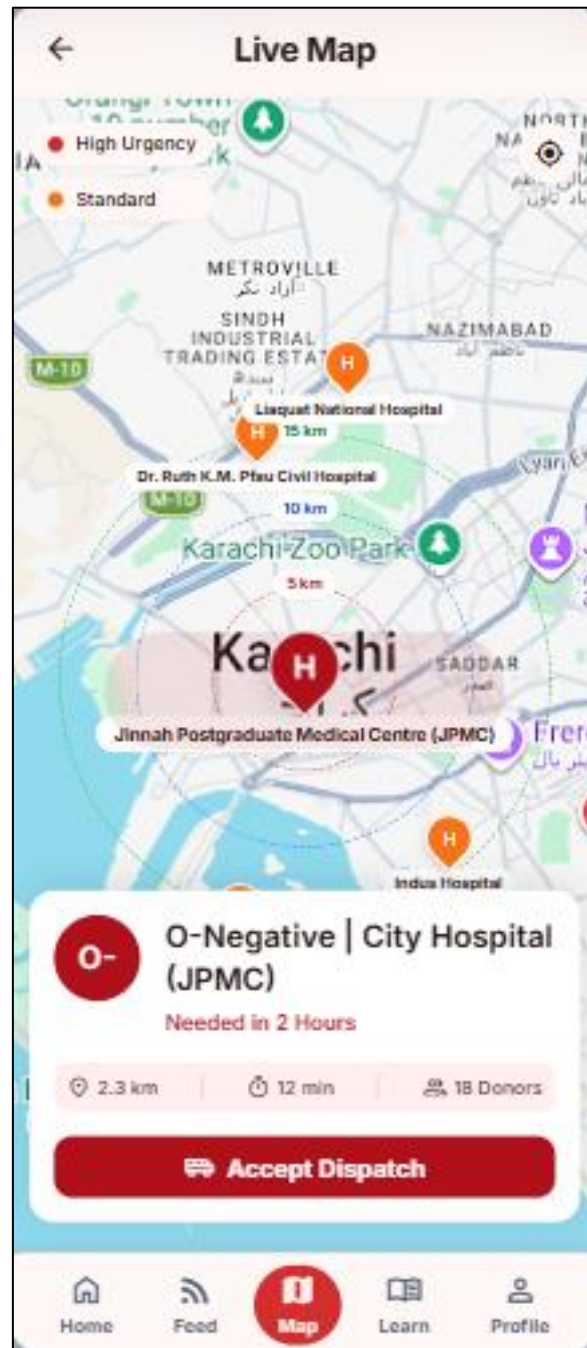

3. **Donor Home Dashboard:** Prominent "Available to Donate" location toggle, current eligibility status badge, and emergency request counter.

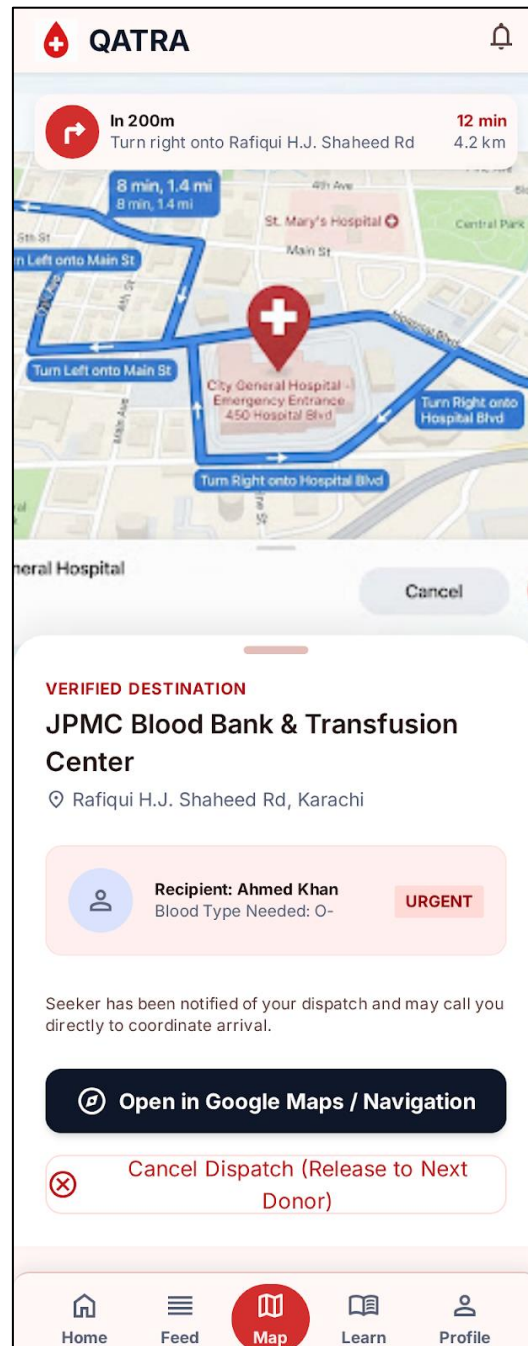

4. **Geo-Fenced Push Notification:** High-urgency alert modal overlay showing blood group required, target hospital, distance, and urgency indicator.

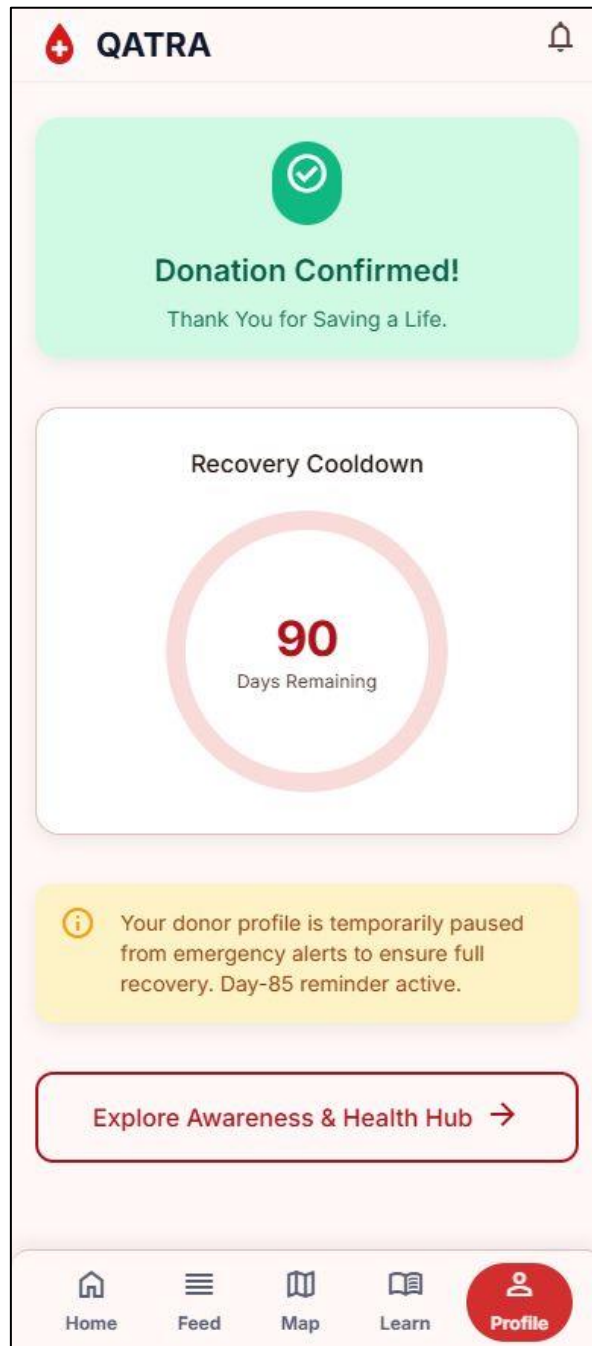

5. **Interactive Map View:** Karachi map centered with concentric radial rings (5 km, 10 km, 15 km), color-coded hospital pins, and an expandable summary card with [Accept Dispatch] / [Decline].

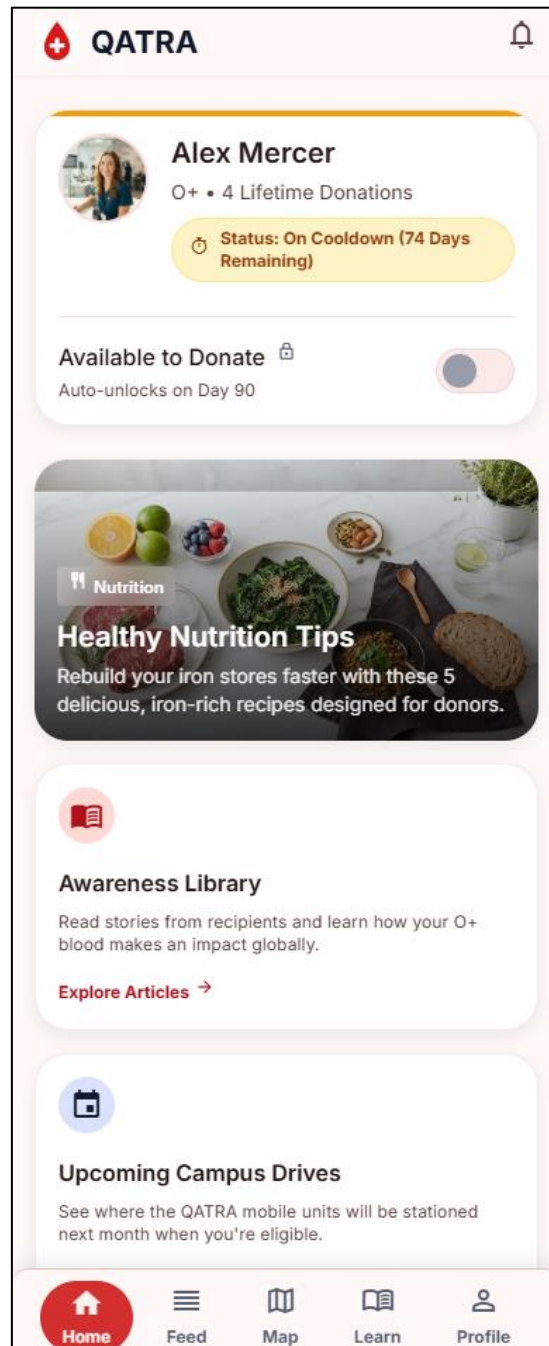

6. **Navigation & Proxy Routing View:** Turn-by-turn routing to the hospital with a direct masked call button to the seeker.

7. **Donation Complete & Cooldown Activation:** Success screen confirming blood draw and initializing the active **90-Day Cooldown countdown timer** with Day-85 reminder flags.

8. **Cooldown State View:** Locked donor dashboard showing remaining cooldown days, preventing dispatch alerts while allowing full access to the Awareness module.
